23.6" LCD Monitor with round design

The new 23.6" monitor with an improved resolution of 1280x1280 pixels is used not only in the gaming machine industry, but also in video art and sales promotion at the point of sale. With a brightness of 700 cd/m² and a diameter of 600 mm (active display area), the round 23.6" monitor can be used for many applications. A built-in Android media player allows video files to be played in endless mode (from a USB stick) immediately after power is supplied. Optionally, the round 23.6" monitor can also be ordered with an HDMI or DP interface for connecting external playback devices.

Applications: Video art, retail, trade fair construction, museums, restaurants, clock

Part Number	CRY-MBVI-R2360N
